Summary

I'm a researcher working at the intersection of AI, hyperspectral imaging and remote sensing for agri-food systems — from UAV and satellite crop monitoring to computer vision for fruit quality, using deep learning methods built for the noisy, high-dimensional data typical of field and postharvest environments.

I completed my Ph.D. at the University of Seville and a postdoc at KU Leuven on hyperspectral detection of Fusarium head blight. I now work in the Postharvest programme at IRTA–Fruitcentre in Lleida, detecting fruit disorders before they become visible, while also running Agrocoding and advising Planticus as Chief AI Consultant.

Research stats: 19+ peer-reviewed articles • 1,000+ citations • 9 h-index • 3 countries worked in

Experience

Researcher, Postharvest Programme 2025 – present

IRTA – Fruitcentre, Lleida, Spain

Chief AI Consultant ongoing

Planticus

Founder ongoing

Agrocoding

Postdoctoral Researcher 2022 – 2025

KU Leuven, Belgium

Researcher 2016 – 2022

University of Seville, Spain

Education

Ph.D., Agricultural Engineering 2018 – 2022

University of Seville, Spain

M.Sc. (x2), Agricultural Engineering 2017

University of Seville, Spain

B.Sc., Agricultural Engineering 2012 – 2016

University of Seville, Spain

Awards & Distinctions

- Award-winning doctoral thesis in precision agriculture, Spain/Portugal (2022–2023)
- PIF Fellowship, University of Seville (2018)
- Distinguished academic performance award, B.Sc. Agricultural Engineering, University of Seville
- Extraordinary end-of-studies distinction, both M.Sc. degrees, University of Seville

This is a one-page summary CV generated from the website's own data (data/profile.json) as a placeholder. Replace this file with your official summarized CV (e.g. the Ministerio/FECYT normalized CV, CVN/CVA) at assets/cv/enrique-apolo-apolo-cv.pdf, keeping the same filename so the "CV" link in the site's menu keeps working — or update cvUrl in data/profile.json to point at a different file.
